5.2 “Governmental unit” means State of Illinois, any State agency as defined in Section 1-15.100 of the Illinois Procurement Code, officers of the State of Illinois, any public authority in Illinois which has the power to tax or any other public entity created by Illinois statute.

5.3 “Qualified not-for-profit agency” means any not-for-profit agency that qualifies under Section 45-35 of the Illinois Procurement code and that either (1) acts pursuant to a board established by or controlled by a unit of local government or (2) receives grant funds from the State or from a unit of local government.

Required Federal Clauses, Certifications and Assurances

Public Works Requirements (construction and maintenance of a public work) 820 ILCS 130/4.

PREVAILING WAGE ACT: This Contract calls for the construction of a “public work”, within the meaning of the Illinois Prevailing Wage Act, 820 ILCS 130/.01 et seq. (“the Prevailing Wage Act”). The Prevailing Wage Act requires vendors and subcontractors to pay laborers, workers and mechanics performing services on public works projects no less than the current “prevailing rate of wages” (hourly cash wages plus amount for fringe benefits) in the county where the work is performed. The Code requires vendors that are awarded certain service contracts to pay service workers no less than the general prevailing wage rates of hourly wages (hourly cash wages plus amount for fringe benefits) in the county where the work is performed. The Illinois Department of Labor publishes the prevailing wage rates on its website at <http://labor.illinois.gov>. The Illinois Department of Labor revises the prevailing wage rates, and Vendor and any subcontractors have an obligation to check the Illinois Department of Labor’s website for revisions to prevailing wage rates. Please refer to the Illinois Department of Labor’s website. Vendor and any subcontractors rendering services under this Contract must comply with all requirements of the Prevailing Wage Act and Code, including but not limited to, all wage requirements and notice and record keeping duties.

Prevailing Wage (janitorial cleaning, window cleaning, building and grounds, site technician, natural resources, food services, security services, and printing, if valued at more than \$200 per month or \$2,000 per year) 30 ILCS 500/25-60.

PREVAILING WAGE ACT: This Contract is a service contract subject to the prevailing wage requirements of the Illinois Procurement Code, 30 ILCS 500/25-60 (the "Code"). The Prevailing Wage Act requires vendors and subcontractors to pay laborers, workers and mechanics performing services on public works projects no less than the current "prevailing rate of wages" (hourly cash wages plus amount for fringe benefits) in the county where the work is performed. The Code requires vendors that are awarded certain service contracts to pay service workers no less than the general prevailing wage rates of hourly wages (hourly cash wages plus amount for fringe benefits) in the county where the work is performed. The Illinois Department of Labor publishes the prevailing wage rates on its website at <http://labor.illinois.gov>. The Illinois Department of Labor revises the prevailing wage rates, and Vendor and any subcontractors have an obligation to check the Illinois Department of Labor's website for revisions to prevailing wage rates. Please refer to the Illinois Department of Labor's website. Vendor and any subcontractors rendering services under this Contract must comply with all requirements of the Prevailing Wage Act and Code, including but not limited to, all wage requirements and notice and record keeping duties.

- EMPLOYMENT OF ILLINOIS WORKERS ON PUBLIC WORKS: In a period of excessive unemployment rates, State vendors (1) constructing or building any public works or (2) cleaning-up and disposing on-site of hazardous waste, and that clean-up or on-site disposal is funded or financed in whole or in part with State funds or funds administered by the State, are required to employ at least 90% Illinois laborers on such project. For projects involving clean-up and on-site disposal of hazardous waste, emergency response or immediate removal activities are excluded. This requirement applies to all labor whether skilled, semi-skilled or unskilled, whether manual or non-manual.

A period of excessive unemployment rates is defined as any month immediately following two consecutive calendar months during which the level of unemployment in the State of Illinois has exceeded 5% as measured by the United States Bureau of Labor Statistics in its monthly publication of employment and unemployment figures.

Any public works project financed in whole or in part by federal funds administered by the State of Illinois is covered under the provisions of this requirement, to the extent permitted by any applicable federal law or regulation. 30 ILCS 570.

Vendors may receive an exception from this requirement by submitting a request and supporting documents certifying that Illinois laborers are either not available or are incapable of performing the particular type of work involved. The certification must: (a) be submitted to the agency within the first quarter of the Contract term; (b) provide sufficient support that demonstrates the exception is met; (c) be signed by an authorized signatory of the vendor; and (d) be approved by the agency.

- ILLINOIS WORKS JOBS PROGRAM ACT (30 ILCS 559/20-1 et seq.): For a contract that utilizes appropriated capital funds in whole or in part, involves the construction of a public work, and has with an estimated total project cost of \$500,000 or more, Vendor must comply with the Illinois Works Apprenticeship Initiative (30 ILCS 559/20-20 to 20-25) and all applicable administrative rules. The "estimated total project cost" is a good faith

approximation of the costs of the entire project. The goal of the Illinois Apprenticeship Initiative is that apprentices will perform either 10% of the total labor hours actually worked in each prevailing wage classification or 10% of the estimated labor hours in each prevailing wage classification, whichever is less. Vendor may seek from the Department of Commerce and Economic Opportunity (“DCEO”) a waiver or reduction of this goal in certain circumstances pursuant to 30 ILCS 559/20-20(b). Vendor must ensure compliance for the life of the entire project, including during the term of the Contract and after the term ends, if applicable, and will be required to report on and certify its compliance.

Agency Specific Terms and Conditions

- (2) Vendor shall provide the following System Security Plan (SSP):
The Vendor must develop a SSP using the guidance from NIST Risk Management Framework (RMF) (NIST SP 800-18) to establish an information security program in accordance with the Federal Information Security Management Act (FISMA) and demonstrate compliance. This SSP must be approved by an authorizing official within the STATE OF ILLINOIS. The SSP must include, but shall not be limited to, the following:
- i. Description of how the system is to be compliant with all the United States Federal and State of Illinois laws regarding the security and privacy of medical data and records and of all protected health information (PHI), including:
 - a) The Code of Federal Regulations (at 45 CFR 95.621), which provides that State of Illinois agencies are responsible for the security of all automated data processing systems involved in the administration of Department of Health and Human Services’ programs, and which includes the establishment of a security plan that outlines how software and data security will be maintained. This section further requires that State of Illinois agencies conduct a review and evaluation of physical and data security operating procedures and personnel practices on a biennial basis.
 - b) The security and privacy standards contained in Pub. L. 104–191, the Health Insurance Portability and Accountability Act of 1996 (HIPAA), and adopted in 45 CFR Part 164, Subparts C and E, as follows: The security standards require that measures be taken to secure protected health information

that is transmitted or stored in electronic format. The privacy standards apply to protected health information that may be in electronic, oral, and paper form.

c) The requirements in section 1902(a)(7) of the Social Security Act (the Act), as further interpreted in Federal regulations at 42 CFR 431.300 to 307.

- ii. Description of measures to secure data and software;
- iii. Description of how data is encrypted in transit and in storage;
- iv. Description of physical and equipment security measures;
- v. Description of personnel security;
- vi. Description of software used for security;
- vii. Description of the user roles and the access capabilities of each role;
- viii. Description of how users are assigned certain roles;
- ix. Identification of the staff responsible for controlling the system security;
- x. Description of contingency security procedures during a disaster recovery event;
- xi. Description of how Vendor works with Office of the Statewide Chief Information Security Officer to conduct annual security review;
- xii. Description of how Vendor will ensure password security
- xiii. Audit trails for all data access;
- xiv. Acknowledgement that Vendor will be responsible for all costs associated with Identify theft, resulting from security breach.

D. Security Risk Assessment. STATE OF ILLINOIS or an independent entity will perform a security control assessment. STATE OF ILLINOIS will provide Vendor a copy of the approved security control assessment. Once Vendor receives the approved assessment, Vendor must then develop a Security Risk Assessment based on the applicable security controls. Guidance on conducting and documenting the Security Risk Assessment can be obtained in NIST SP 800-30.

E. Plan of Action and Milestones (POA&M). After STATE OF ILLINOIS reviews and approves the Security Risk Assessment, Vendor should begin to develop a POA&M. The POA&M should be a living document that is based on the findings and recommendations of the security assessment report. The POA&M should describe the deficiencies in the security controls, address the residual risk, and detail plans for remediation and identify timeline for such remediation.

F. Authorization Approval Package.

- (a) After STATE OF ILLINOIS reviews and approves the POA&M, Vendor must prepare a transmittal letter to request approval of the entire authorization package. The authorization package must include at a minimum the following documents:
 - i. Transmittal Letter

- ii. Updated System Security Plan
- iii. Security Assessment Plan (include the STATE OF ILLINOIS/independent security assessment)
- iv. Security Assessment Report (include the STATE OF ILLINOIS/independent security assessment)
 - v. Security Risk Assessment
 - vi. Plan of Action and Milestones
 - vii. Supporting Documentation including but not limited to design documentation, “As Built” documentation, operational documentation, validation documentation, prior authorization documentation, and other artifacts associated with the implementation and monitoring of the security controls.
- (b) The authorizing official will determine the risk to the organizational operation and determine if the system is authorized to proceed. The authorizing official will deliver to Vendor a letter of authorization specifying any limitations or restriction placed on the operation of the system. Additionally, this letter should establish an end date for the security authorization.
- (c) If the authorizing official denies the authorization, STATE OF ILLINOIS will continue to work with Vendor until an acceptable level of residual risk for the system is achieved. This work should include the continued remediation listed in the POA&M.

G Life-Cycle Management

Vendor shall perform security system reviews and reauthorization of the system at the direction of STATE OF ILLINOIS. Vendor shall be responsible for meeting the following requirements:

- (a) Performing continuous monitoring of the security system. Vendor’s continuous monitoring must include periodically selecting a subset of the baseline controls for assessment. Based on assessment of these controls, subsequent remediation actions must be identified and implemented. The ongoing remediation process should include updating key documents such as the SSP, SAR, and POA&M.
- (b) Prior to any system or environmental modifications, Vendor must perform a security impact analysis. This must be included as a part of any change management or configuration management process. If the results of the modification indicate changes to the security posture of the system, corrective actions should be initiated and appropriate documents revised and updated. The updating of the documentation and continuous monitoring should provide near real-time risk management.
- (c) A monthly Security Status Report must be produced by Vendor for STATE OF ILLINOIS. The Security Status Report should provide essential

information regarding the security posture of the system as well as the effectiveness of the controls deployed. Ongoing monitoring activities should be detailed as well as ongoing remediation efforts to address known vulnerabilities. Additional guidance for the monitoring of system security can be obtained in NIST SP 800-137.

Security Appendix S5 – Vulnerability Assessment

DoIT Scanning Agreement

Agreement

This agreement is between Department of Innovation & Technology \ Offensive Security Unit (hereinafter referred to as the "risk assessor") and Penetration Testing Services client (hereinafter referred to as the "client") for the supply of Penetration Testing services by the risk assessor for the client.

Whereas the risk assessor provides certain computer and systems security consulting and testing services including Penetration Testing services; and

Whereas the client wishes to retain the risk assessor to provide computer and systems security services, specifically Penetration Testing services; therefore

The client does hereby retain the risk assessor for the purpose of providing Penetration Testing services on the client's computers and/or systems.

The risk assessor will notify the client's project leader of the approximate times that the penetration tests will take place.

The objective of the Penetration Testing service is to identify and report on security vulnerabilities to allow the client the opportunity to address the identified issues in a planned manner, thus providing them the opportunity to significantly raise the level of their security protection. The client understands that Internet security is a continually growing and changing field and that testing by Department of Innovation & Technology \ Offensive Security Unit does not mean that the client's site is secure from every form of attack. There is no such thing as 100% security testing, and for example it is never possible to test for vulnerabilities in software or systems that are not known at the time of testing or the mathematically complete set of all possible inputs/outputs for each software component in use. Further security breaches can and frequently do come from internal sources whose access is not a function of system configuration and/or external access security issues.

The client has provided the risk assessor with certain required information regarding the scope and range of the tests and the client hereby warrants that all information provided is true and accurate and that the client owns or is authorized to represent the owners of the computers and systems described. The client further warrants and represents that he/she is authorized to enter into binding legal agreements. The services provided by the risk assessor are provided in reliance on the above warrants.

The risk assessor shall be under no liability whatsoever to the client for any indirect loss and/or expense (including loss of profit) suffered by the client arising out of any actual or possible breach, by the risk assessor, of this agreement. In the event of any breach of this agreement by the risk assessor the remedies of the client shall be limited to a maximum of the fees paid by the client, for this engagement.

Both parties shall maintain this agreement as confidential. Unless required by law, no information about this agreement (including the agreement terms and fees) shall be released by either party. Information about the client's business, computer systems or security situation that the risk assessor obtains during the course of the work will not be released to any third party without prior written approval unless required by law.

The risk assessor and the client have imparted and may from time to time impart to each other certain confidential information relating to each other's business including specific documentation. Each party agrees that it shall use such confidential information solely for the purposes of the service and that it shall not disclose directly or indirectly to any third party such information. Where disclosure to a third party is required, prior notice of such disclosure will be made. The third party to which such disclosure will be made, will be required to agree to a duly binding agreement to maintain in confidence the information to be disclosed to the same extent at least as the parties are bound. To the extent that disclosure is requested by the Auditor General or otherwise authorized auditor, no additional agreement will be required.

Upon completion of the Penetration Testing service, the reports (deliverables) will be encrypted and delivered to the client while all other data related to the service will be securely stored, destroyed, or returned to the client (at client's option).

This agreement is subject to the laws of the State of Illinois, USA. All disputes arising out of this agreement shall be subject to the exclusive jurisdiction of the State of Illinois, USA.

Neither party shall be liable for any default due to any act of God, war, strike, lockout, industrial action, fire, flood, drought, storm or other event beyond the reasonable control of either party.
